Welcome to the May 2022 issue of the **New Frontiers Construction Update**. Last month was the one-year anniversary of the groundbreaking event. It's hard to believe it's already been a year, but the excitement of that day is still palpable. To celebrate the anniversary and showcase the summary of activities during the last year, we developed a New Frontiers Construction Annual Report. I encourage you to watch the video message below and [access this information online](#).

Although campus is quieter with the end of the spring semester, activity on our New Frontiers construction site is expected to ramp up in the coming months. On April 22, the Oklahoma A&M Board of Regents approved financing for an extra \$15.2 million to support New Frontiers, bringing the total project cost to \$115.2 million. This action enables us to continue progress on the construction site while protecting against any further market inflation.

We are nearing the end of our \$50 million fundraising campaign with less than \$700,000 to go. We can't wait to celebrate reaching this milestone soon. Even when we reach our \$50 million goal, our work will not be done. We will continue to fundraise for available naming opportunities and building features that will elevate teaching, research and Extension efforts.

Together, we are embarking on New Frontiers!

Thomas G. Coon
Vice President and Dean
OSU Agriculture

NEW FRONTIERS

Campaign Progress

With less than \$700,000 remaining, **596 donors** (518 since public launch) have helped us reach **98.7%** of the \$50 million fundraising goal to build a new, state-of-the-art teaching, research and Extension facility for OSU Agriculture.
