Welcome to the September 2022 issue of the **New Frontiers Construction Update**.

I hope you were able to join us for the New Frontiers Tailgate & Beam Signing on Sept. 10. What a successful event it was with a great atmosphere of attendees connecting and networking, pleasant weather, fantastic food, popular promo items and the memorable beam signing! Learn more about the event by reading the [news release](#) and visiting the [photo gallery](#).

Since our last update, tremendous progress has been made on the construction site. The first and second floors are taking shape on the southwest end of the building. Construction crews poured the concrete floors and are currently installing the second-floor columns that will support the third floor. Keep up to date with progress and view live web cams by visiting the link to our construction website below.

Together, we are embarking on New Frontiers!

A handwritten signature in orange ink, which appears to read "Thomas G. Coon".

Campaign Update

The New Frontiers campaign has reached the \$50 million fundraising milestone. While the goal was surpassed in record time, funds will continue to be raised for the facility to enhance teaching, research and Extension efforts.
